

To Cambridge City Council,

We, the undersigned, petition the Council to refurbish Donkey Common Skatepark.

The current skatepark is not fit for use by skaters of any ability level. Skateparks need smooth, seamless riding surfaces, but Donkey Common's rough asphalt and modular ramps are unpleasant to skate on and make injuries more likely. The layout of the park is also unsuitable; the ramps are twice as big as they need to be for a park of this size.

Cambridge has six skateparks but only two (Jesus Green and Trumpington) are of a suitable quality. This lack of appropriate facilities means that Cambridge skateparks are overcrowded, making them dangerous and off-putting to beginners.

The council approves in principle of this plan, and it has the backing of many local skaters, businesses, and councillors. We now need the council to make refurbishing this skatepark a priority and commit time and money towards making it a reality.

To Cambridge City Council,

We, the undersigned, petition the Council to refurbish Donkey Common Skatepark.

The current skatepark is not fit for use by skaters of any ability level. Skateparks need smooth, seamless riding surfaces, but Donkey Common's rough asphalt and modular ramps are unpleasant to skate on and make injuries more likely. The layout of the park is also unsuitable; the ramps are twice as big as they need to be for a park of this size.

Cambridge has six skateparks but only two (Jesus Green and Trumpington) are of a suitable quality. This lack of appropriate facilities means that Cambridge skateparks are overcrowded, making them dangerous and off-putting to beginners.

The council approves in principle of this plan, and it has the backing of many local skaters, businesses, and councillors. We now need the council to make refurbishing this skatepark a priority and commit time and money towards making it a reality.
